

# Environmental Policy

## J Randall Roofing Contractors Ltd

J Randall Roofing Contractors have over 20 years' experience carrying out all aspects of roofing and associated works for a range of public and private clients throughout the UK. Our success is based on a proactive approach to all roofing solutions combined with technical support; quality procedures and effective communication resulting in service excellence and total client satisfaction.

To further enhance our quality and, health and safety practices, we have implemented a formal environmental management system (EMS) which will be inspected annually by the UKAS accredited Inspection Body Tarian Inspection Services against the BS 8555 Environmental Seren Scheme to demonstrate to our clients we uphold the commitments made herein.

We have identified our most significant impacts and risks in an Aspects & Risk Register and ensure we have appropriate and robust controls in place for managing these. This includes but is not limited to completion of regular site environmental checksheets. This helps us to maintain our commitment to the protection of the environment and prevention of pollution.

We have and shall continue to set environmental objectives appropriate to our business in order that we may demonstrate our commitment to continual improvement of the EMS to enhance environmental performance. We shall as part of this process monitor our utility consumption, waste and transport as necessary.

We are fully committed to upholding our compliance obligations and have a robust process for ensuring this is the case. We outsource external support if necessary to facilitate this commitment.

We shall ensure all persons working for or on our behalf are aware of this Environmental Policy, BS 8555 and procedures and practices relevant to their roles. To facilitate this, we shall conduct regular and appropriate toolbox talks as well as other means of ensuring our staff are knowledgeable of environmental risks and opportunities associated with our business.

Signed

J Randall
